

Favaretti GROUP

CATALOGUE 2025

I SPORT

Because indoors you give your best

Diverse and customized solutions for every type of sports facility. Thanks to the design flexibility, the speed of installation, the minimal maintenance and the low management costs, the covers for sports facilities by Favaretti are characterized by a considerable **competitive advantage** compared to classic masonry works and are able to meet different needs: to use the facility in every season and in any climatic condition, to relocate it quickly, to reduce management costs and to streamline bureaucratic procedures.

Our structures are CE marked according to the mandatory EN 1090-1 and recalled by the NTC 2018 and D.LGS 106/2017 in compliance with EU regulation No. 305/2011.

We build tensile structures in steel, glulam wood and air-supported domes complete with all accessories. All solutions are customizable in shape and size and can adapt to the specific needs of each sport.

Advantages

LARGE PLAY AREAS

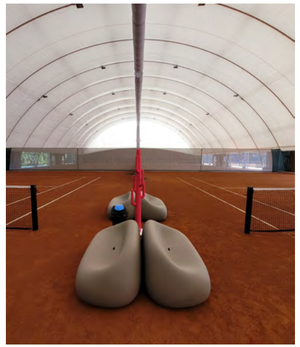

Having a structure up to 60m wide, they allow for the design of extremely flexible and functional structures for any sporting activity.

DESIGN FLEXIBILITY

Structures completely independent of traditional masonry works. The limit of shape and size is only given by your imagination.

IMMEDIATE INSTALLATION

The intervention is immediate and completed in a few days. It requires minimal foundation work. The procedures for obtaining permits are also much easier

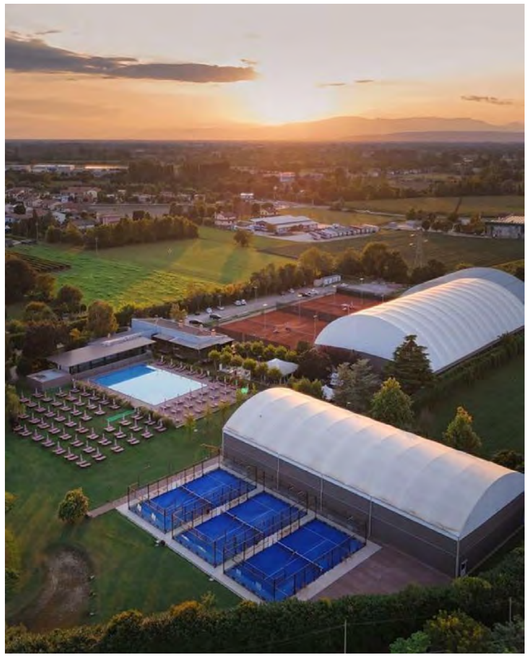

Available sports canopies

- VOLLEYBALL & BASKET
- SWIMMING POOLS
- BEACH SPORTS
- INDOOR SOCCER
- TENNIS & PADEL
- HOCKEY & SKATING
- CROSS FIT & GYMS

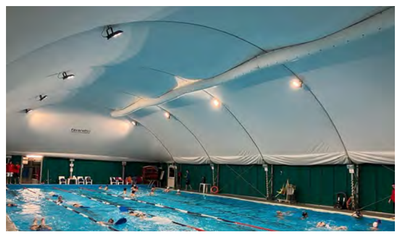

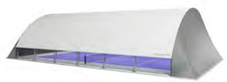

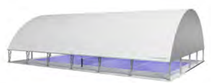

Structures /Steel

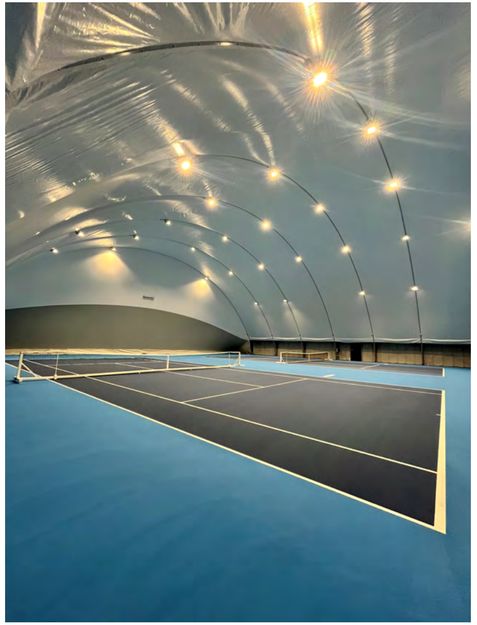

FAVARETTI | TENSOSTRUCTURES | !SPORT

MULTISPORT structure in hot-dip galvanized steel and covered with a single or double PVC membrane. The incredible design flexibility typical of these structures allows to meet the needs of each club in terms of size and type of activity. Each structure can be equipped with various options to make it as comfortable and performing as possible.

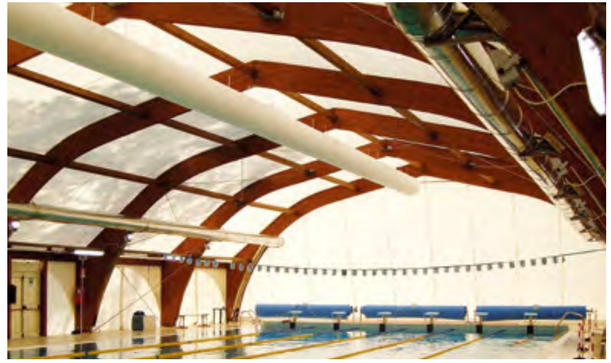

The steel structure ensures extreme flexibility, combined with low costs and the absence of maintenance.

Structures /Glued Laminated Timber

Suitable for all types of sports activities (swimming pools, tennis, five-a-side football, basketball, etc.), they can be built for the creation of **medium and large indoor sports facilities.** Each structure can have different shapes and sizes, with the possibility of customization and functionality with the addition of **accessories and equipment**.

> The sports tensile structures with glulam arches represent a solution with a strong aesthetic impact like steel structures, and can be made completely custom.

Structures / Air-Supported Domes

Temporary covering solution with a low economic impact.

Air-supported domes do **not require any rigid supporting structure** and are simply supported by a continuous flow of air.

Ideal for covering **medium-sized** surfaces, they **can be disassembled and reinstalled** in a few hours and require a **limited initial investment**.

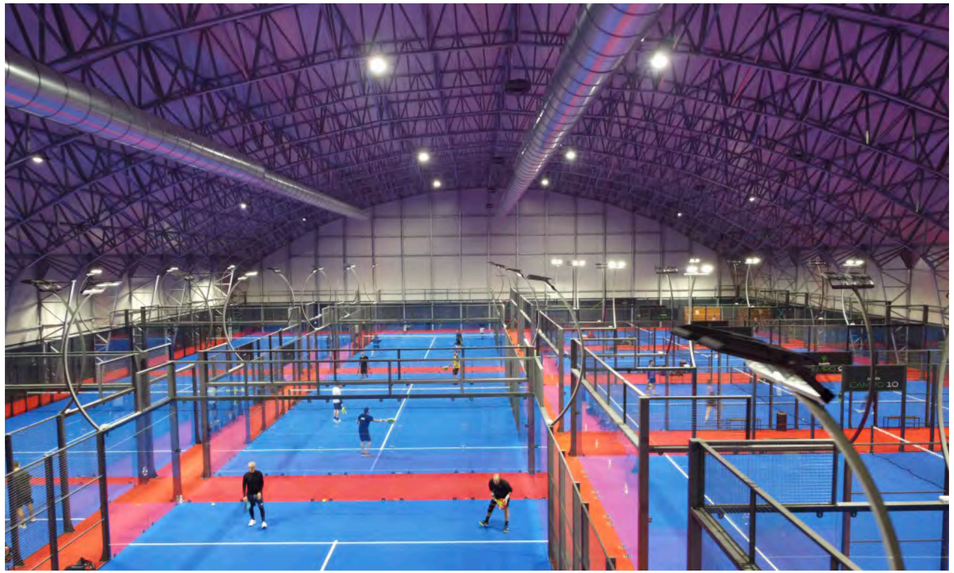

Various options and accessories available upon request.

Structures / Insulated Panels

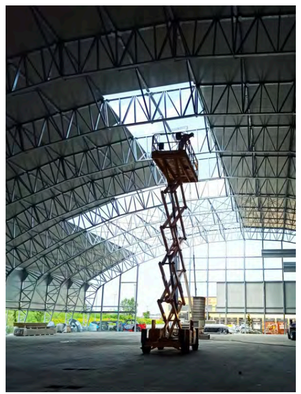

FAVARETTI | TENSOSTRUCTURES | !SPORT

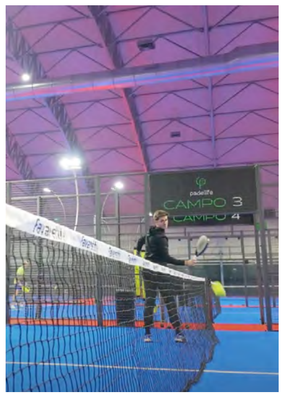

Not only padel, insulated panels are a perfect fit in all sports contexts. Possibility of integration with polycarbonate inserts on the head or cylinder for better internal brightness.

More performing and sustainable structures from an energy point of view with an insulation package of variable thickness (available from 60 to 150 mm).

Possibility of installing photovoltaic panels on the roof and infinite color combinations.

2 RIDING ARENAS

Because passion can't wait

Train all year round regardless of weather conditions, in an elegant, durable and valuable structure.

Speed of installation, easy permits, durability over time, versatility and low costs make our structures the best possible alternative to conventional buildings.

Our structures are CE marked according to EN 1090-1 (mandatory and referenced by NTC 2018 and D.Lgs 106/2017) in compliance with EU regulation No. 305/2011.

Advantages

SAVINGS & COMFORT

The translucent covering membrane allows sunlight to filter inside the field, eliminating the need for artificial lighting and reducing energy costs. Various accessories are available upon request for greater interior comfort.

SIMPLER INSTALLATION

No expensive construction work is required. The structure can be anchored directly to the ground with special augers. Fast bureaucratic procedures (even in restricted areas) and lower installation costs!

CUSTOMIZATION

Completely custom-made works, of any size and without any internal obstacles. The structures can be equipped with lighting systems and sliding walls, while, to facilitate obtaining permits, the covering membrane can be made with individual removable sheets.

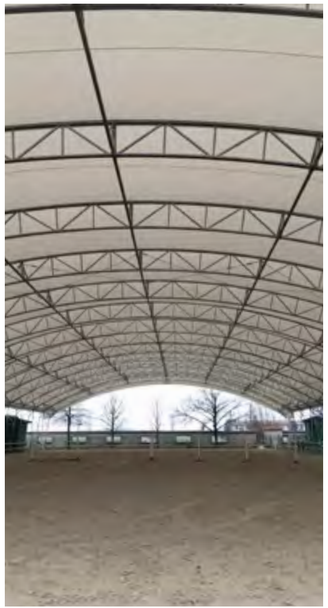

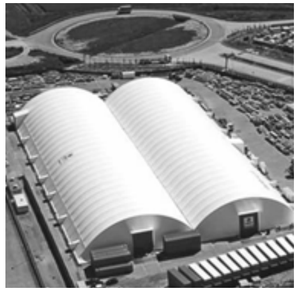

3 INDUSTRY

Because space is never enough

Ideal solution for the creation of **permanent or temporary covered spaces** to be used as production areas, industrial warehouses, storage warehouses for goods, loading/unloading areas, storage of vehicles and equipment.

The full design flexibility allows for the creation of both fixed and retractable structures of any size and shape. A further possibility of customization is given by the covering with rigid insulated panels.

Our structures are CE marked according to the mandatory EN 1090-1 and recalled by the NTC 2018 and D.Lgs 106/2017 in compliance with EU regulation No. 305/2011.

Advantages

INDUSTRIAL DESIGN WITH FREE LIGHT

Our works do not require internal columns, increasing the usable work space and maximizing storage capacity.

FLEXIBLE AND RELOCATABLE

Completely custom-made structures. The customer is not bound by standard shapes and sizes. Depending on business needs, the structure can be disassembled and moved to another location.

COMPLIANCE WITH REGULATIONS

Each structure is designed in compliance with the regulations of the geographical area in which it is installed. Snow, wind and seismic loads are certified.

NATURAL LIGHT AND ENERGY EFFICIENCY

A safer and more comfortable working environment for workers. Eliminating artificial lighting during daylight hours results in significant cost savings.

4 LARGE SYSTEMS

Why some projects are unique

Our structures are CE marked according to EN 1090-1 (mandatory and recalled by NTC 2018 and D.Lgs 106/2017) in compliance with EU regulation No. 305/2011.

Tensostrutture per esigenze speciali, altamente personalizzate nella forma, nelle dimensioni e nell'aspetto.

Our large systems have been designed as a response to particular needs that cannot be satisfied with "standard" tensile structures. These are in fact highly customized systems not only in size, but also in shape and appearance.

Technologically advanced and with a strong impact, the large systems signed by Favaretti are suitable for any sports, industrial, commercial and entertainment environment.

100% customizable

We guarantee the highest levels of professionalism and know how to manage every need. We are able to act as general contractor for the construction of your facility.

100% exclusive

Favaretti Group

Our goal is to provide **solid, certified, customized tensile structures** suitable for any purpose and field of application.
Tell us what your needs are: we will be able to **design, build and install** the perfect tensile structure for you.
